Refactoring & DX    Mentoring & pair programming    Communication & documentation    Hexagonal architecture

### EXPERIENCE

**FULLSTACK DEVELOPER**   VISEO · Grenoble · On-site | Jan 2025 – Jul 2025

- Designed a hexagonal architecture for a React application, centralizing sensitive document tracking in a complex banking environment.
- Authored comprehensive technical documentation, adopted as internal reference, facilitating team transitions and cross-team collaboration.
- Improved team dynamics and collaboration through a unifying technical approach.

React.js   TypeScript   GitLab   Jest   Hexagonal architecture

**FREELANCE FRONT-END DEVELOPER**   Tudigo · Bordeaux · On-site | Oct 2023 – Jan 2024

- Implemented hexagonal architecture and NX monorepo to modernize the website, improving maintainability and performance.
- Shared knowledge through pair programming sessions and code reviews, strengthening code quality and cross-team collaboration.

React.js   TypeScript   NX   Jest   Hexagonal architecture

**FREELANCE FRONT-END DEVELOPER, SOFTWARE ARCHITECT**   Artelia · Remote | Jul 2022 – Sep 2023

- Complete refactoring of a React application, achieving 10x performance improvement through hexagonal architecture and unit testing.
- Mentored a junior developer, facilitating their transition to freelancing, and documented processes for the team.
- Collaborated with teams to integrate backend improvements following successful front-end refactoring.

React.js   TypeScript   Storybook   Jest   React Query

**FREELANCE FRONT-END DEVELOPER**   EXA Market | Mar 2022 – Jul 2022

- Developed a POC in React and Tailwind for a decentralized chat, validating technical feasibility with Matrix protocol.
- Collaborated with the open source community to integrate a Matrix SDK, fostering innovation in a startup environment.

React.js   TailwindCSS   Matrix   TypeScript

**FREELANCE FRONT-END DEVELOPER**   EU4UA.org · Volunteer | Mar 2022 – Apr 2022

- Volunteer contribution to technical design of a React application for a humanitarian project, laying solid foundations for autonomous development.
- Technical leadership in an urgent context, structuring the project for a scalable and maintainable application.

React.js   TypeScript   Figma

EXPERIENCE (CONTINUED)

FREELANCE FRONT-END DEVELOPER Sigilium | Oct 2021 – Feb 2022

– Rapid development of a Microsoft Outlook add-in, integrating HTML signatures with SSO authentication to enhance email personalization.

TypeScript

Node.js

Microsoft Azure

React.js

FREELANCE BACK-END DEVELOPER Scalify | Nov 2021 – Jan 2022

– Upgraded Node.js projects from version 10 to 16, replacing deprecated methods to improve application performance.
